Movement51

We're on a mission to power the full, economic participation of women and gender-diverse people through education and community.

We envision a world where our organization is no longer needed — where gender-specific programming and strategies are a thing of the past, and women and gender-diverse individuals are equally included, funded and championed.

When we get there, we'll know we have reached our vision and achieved radical change.

Why we started the Financial Feminism Investing Lab

We wanted to create an education platform to help activate a more equity-driven financial community.
